

MOODY'S

Lending suite Monitoring solution Automated covenants

HOW DOES IT WORK?

1

System reads all active covenants and automatically infers documentation requirements and schedule.

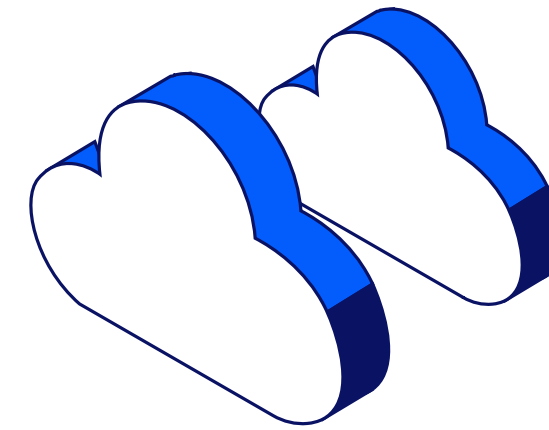

2

System prepares and sends personalized communications to clients across entire portfolio.

3

Clients can upload through secure channel or email back directly. Users are notified whenever documentation is added.

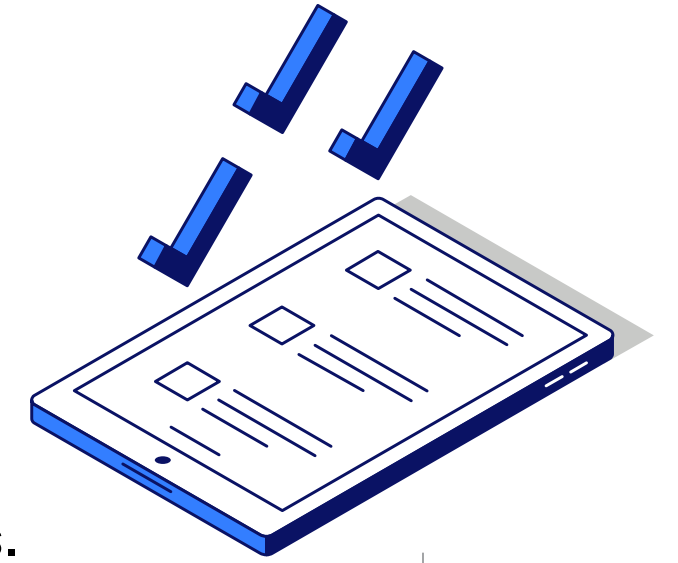

4

AI automatically names and organizes incoming documents.

5

Internal users can quickly validate incoming documentation and compliance with covenants.

6

System automatically files documents for record in your document management system.
